

# LGBTQ+ Inclusion Masterclass Series

A 3-part webinar series for leaders to assess organisational readiness for LGBTQ+ inclusion and learn best practice standards on LGBTQ inclusive policy development and data collection.

**For more information on each Masterclass and to register click [here](#).**

This pilot series introduces organisations and individuals to LGBTQ+ inclusive care. It looks at some of the foundational steps required to make care services inclusive for the LGBTQ community. It is designed for those in decision making roles and quality teams who can impact organisational change, quality processes, policies, and forms.

It is recommended that each organisation send two people to each session, however, the people can change from session to session based on the audience requirements.

By the end of the series participants will be able to articulate why LGBTQ+ inclusivity is needed and identify gaps in their current process. They will be able to review their policy and data collection practices with an inclusion lens and recommend changes and improvements.
